CAREER OBJECTIVE

To contribute as an SAP Basis Consultant / SAP BTP Administrator by applying practical experience in SAP system administration, monitoring, user and authorization management, transport coordination, database operations, and cloud connectivity while continuing to develop technical expertise and deliver reliable business support.

PROFESSIONAL PROFILE

SAP Basis Consultant with approximately 2 years of hands-on experience supporting SAP S/4HANA 2023, SAP ECC 6.0, and SAP HANA environments. Familiar with SAP BTP administration, system refresh and client copy support, incident handling, production operations, ticketing workflows, and SLA-based follow-up. Comfortable working rotational shifts and supporting planned maintenance and on-call activities.

TECHNICAL SKILLS

SAP Basis Administration: SAP S/4HANA 2023, SAP ECC 6.0 EHP8, SWPM, system refresh, client copy (SCCL/SCC9), SAP Notes
Monitoring & Troubleshooting: ST22, SM21, ST03N, ST06, SM37, SM50, SM66, DBACOCKPIT, background jobs, table locks
User & Authorization: SU01, PFCG, user maintenance, role assignments, access issue investigation
Transport & Connectivity: STMS, SM59/RFC, SAP Router, STRUST, SSL certificates
SAP BTP: Subaccounts, entitlements, role collections, service instances, destinations, Cloud Foundry, Cloud Connector
Database & Tools: SAP HANA/MDC, backup and recovery, HANA Studio, SAP GUI, SAP Management Console, Java stack, ADS
Service Operations: Incident/request tracking, ticket updates, SLA awareness, documentation, escalation and stakeholder coordination

PROFESSIONAL EXPERIENCE

SAP Basis Consultant | ManbiTech Pvt. Ltd.

December 2024 – Present | India

- Support daily administration and operational activities for SAP S/4HANA, SAP ECC, and SAP HANA environments.
- Monitor system health, work processes, workload, background jobs, system logs, ABAP dumps, and database status using standard SAP transactions.
- Maintain SAP user accounts and role assignments using SU01 and PFCG; investigate access issues and coordinate authorization corrections.
- Support transport management using STMS and assist with client copy and system refresh activities across Development, Quality, and Production landscapes.
- Support SAP HANA database operations, including monitoring and backup/recovery checks, and help investigate connectivity or performance issues.
- Assist with SAP BTP administration, including subaccount access, entitlements, role collections, service configuration, destinations, and Cloud Connector connectivity.
- Check RFC connections through SM59 and support SSL certificate and secure communication configuration through STRUST.
- Track incidents and service requests, record troubleshooting steps, provide progress updates, and follow up with relevant teams within SLA timelines.
- Support SAP Notes implementation, BC/BF activation, Java stack and Adobe Document Services (ADS) activities as required.

SELECTED PROJECT EXPERIENCE

SAP System Refresh & Client Copy Support: Assisted with refresh/client-copy coordination, post-activity checks, connectivity validation, and operational verification across SAP landscape tiers.
SAP BTP & Cloud Connector Administration: Supported subaccount access, role collections, destinations, service configuration, and secure connectivity between SAP BTP and backend SAP systems.

EDUCATION

Bachelor of Computer Applications (BCA)
Berhampur University | 2024 | 77.85%
